

Mike Welsh

President

Mike Welsh is an entrepreneurial leader with 40+ years in the fields of finance, investment, and real estate development. He has raised debt and equity capital, procured financing for large public and private projects, and managed real estate companies with 50+ employees. His ability to analyze and improve key profit drivers points to fostering a results-oriented culture.

In conjunction with managing a rewarding mortgage business, Mike is a successful real estate developer, having overseen the financing and construction of dozens of condominiums, apartments, and single-family residences in the greater Los Angeles area. His ability to leverage professional relationships and collaborate with like-minded, caring individuals to bring about positive change is a hallmark to his success, including developing an innovative real estate sales model that was implemented throughout the country.

Mike's work in the community has enabled him to keep abreast of cultural changes affecting legislation and education policy. Recognizing the rapid influx of harmful ideology being introduced into California's school curriculum concurrent with the departure of important liberal arts skills like critical thinking, Socratic discussion, and open, respectful debate, Mike became motivated to provide a solution by spearheading the onset of a classical school in his community.

Educational Background

B.S. Business – University of Southern California
